# A commitment to nature

As a company born in the South Island of New Zealand, nature has always provided our inspiration. Though we never take it for granted, especially when it comes to water.

Pure, fresh water is a necessity of life yet increasingly scarce. That's why at Methven we make taking care of water a primary focus in every product we develop.

A shower typically accounts for around 30% of household water use. So, our innovative shower technologies have been designed to deliver a luxurious experience whist preserving water.

When you're as passionate about water as we are, making the most of it comes as second nature.

# Making magic with water since

1886

Our love of water began the day George Methven began producing brass and iron hardware in New Zealand, back in 1886. Ever since, we've been captivated by its power to transform: to change our moods, lift our spirits, to make us feel refreshed and renewed.

It's a passion that has inspired generations of Methven engineers and designers in a quest to create the ultimate experience of water.

Today, we offer a range of exceptional water experiences that all share one vision. The ability to create a treat for the senses.

This is what sets Methven apart. Because when you experience Methven, you truly experience water.

Experience vitality with Airstream™

A conventional needle jet spray was originally designed to allow water to flow as freely as possible and deliver the maximum amount of water.

At Methven we believe in optimising water performance creating the best showering experience but, while using less water thereby reducing our environmental impact.

### A refreshing combination of air and water that delivers a rain like feel to your shower.

Fully integrated into the base of the handset, Airstream technology allows air to be drawn in and mixed with water at high pressure.

Each air infused droplet then emerges from the shower head as a larger, softer, rain like drop.

# METHV<sup>®</sup>EN Aurajet<sup>™</sup>

Experience the sensation that is Satinjet<sup>®</sup>

### A sensation for both mind and body.

Satinjet uses unique twin-jet technology to create optimum water droplet size and pressure.

Delivering 300,000 of these droplets per second\*, Satinjet creates a truly immersive, full body shower experience. Available at 8 litres per minute or low flow at 5.5 litres per minute.

\*Spray Analysis and Research Services -Test #2010T89+1 Kiri Satinjet at 250kPa

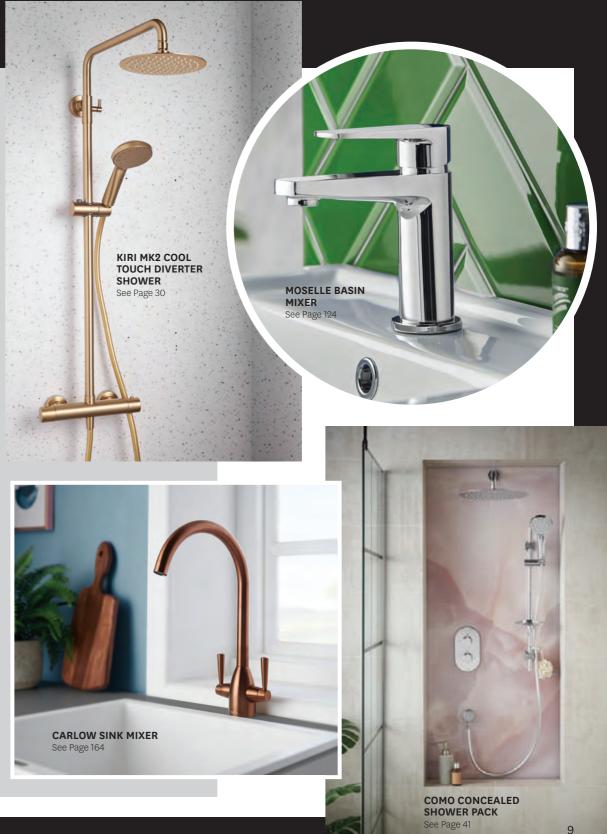

Experience the unforgettable feeling of Aurajet<sup>®</sup>

# It looks and feels out of this world.

Hidden nozzles generate individual jets of water that collide against precisely angled surfaces within Aurajet's open, seemingly floating, shower head.

The result is a stunning fan of luxuriously dense droplets, delivering 20% more spray force than a conventional shower, and twice the amount of water contact with your skin\*. Its enveloping warmth and heavenly feeling has to be felt to be believed. Available at 8 litres per minute or low flow at 5.7 litres per minute.

### Methven UK is proud to be a Carbon Neutral Company

As part of our commitment to offsetting the carbon output of our operations in order to become carbon neutral, we have achieved THG Eco Carbon Neutral status for the third year running. The process of achieving this involved analysing and accurately quantifying direct carbon output from our operations, as well as indirect emissions associated with the purchase of energy.

### Waste management & recycling

For the last two years we have been a zero-to-landfill company. We work closely with specialist waste management partners to ensure that all of our waste is recycled or reused.

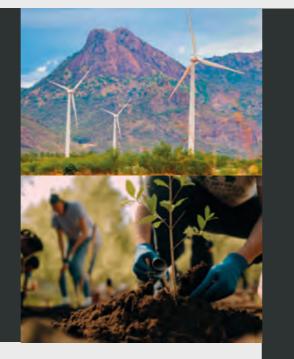

#### Recycling

We produce around 242 tonnes of waste each year and we have several initiatives to reduce, reuse and recycle our waste where possible.

In line with requirements of the certification, we have offset our Scope 1 and Scope 2 emissions working with THG Eco to support the installation of wind turbines in India, while 101 trees have been planted in Methven's name through the THG 'more:trees' programme.

We are always looking at building a greater understanding of the environmental impact of our work in order to address and reduce it and working with THG Eco gave us a credible and easy to understand insight into the carbon emissions produced by our operations, while also allowing us to offset this through supporting their network of projects.

THG Eco works with various organisations across multiple industries, to advise and support on ways to offset and reduce Greenhouse Gas Emissions (GHG) and carbon output across Scopes 1, 2 and 3, with the aim to become Net Zero in line with the 2050 guidelines, determined by the UK Government under the Paris Agreement.

### **Other Initiatives**

**Hybrid Fleet** We have started transitioning our motor fleet to hybrid vehicles reducing our CO emissions.

#### **Energy Monitoring**

We monitor our energy usage on a monthly basis at our two sites - the Distribution Hub and Experience Centre and identify opportunities for improvement.

#### Sustainable Partnerships

We have partnered with the HUT Group to support us in acheiving our Carbon Neutral status.

**Cardboard Waste** 17.5 tonnes of cardboard waste were recycled from our warehouse operations.

### In 2024

Packaging All product packaging was fully recyclable and 70-80% made from recycled materials.

#### Pallet Wrap

Fully recyclable pallet wrap used – pre-streched as well as being lighter and thinner means it uses 50% less plastic than standard wrap.

**Transit Packaging** 80% of our transit packaging was made from recycled

materials.

### **Pallet Management**

Broken or damaged pallets were identified and recycled by our waste management partner.

E-Waste

All redundant and outdated e-waste was securely recycled by one of our sustainable partners.

### We sent no waste to landfill in 2024.

#### **ISO 9001 CERTIFIED**

We believe that quality of service, before and after sale, is of the utmost importance. It's for this reason that we constantly strive to improve both our service to you and our product offering by listening to your comments and suggestions. By doing this it has helped us achieve and retain the renowned ISO9001 since 1995 – proving to you that we are a quality assured company.

#### ISO 14001 CERTIFIED

We believe in looking after the environment by actively seeking to reduce energy consumption, while improving energy efficiency and using renewable or recyclable materials wherever we can. Besides developing our own ideas, whether they are new innovations in design or environmental issues, we also work closely with trade bodies to further ensure you're getting the best products and service possible. In recognition of our focus on the environment, we have achieved ISO 14001 accreditation; demonstrating our commitment towards environmental issues and our pledge to reducing the impact our business has on the environment.

#### **KUKREG4**

The Kiwa UK Regulation 4 Product Approval Scheme (KUKreg4) is a robust method for demonstrating compliance with the Water Supply (Water Fittings) Regulations 1999. The regulations set legal requirements for the design, installation, operation and maintenance of water fittings, systems and appliances, specifically in order to prevent the contamination of drinking water as well as preventing misuse, waste, undue consumption and erroneous measurement.

#### BATHROOM MANUFACTURERS ASSOCIATION (BMA)

Methven UK are members of the Bathroom Manufacturers Association. They ensure the industry has a recognised voice with UK government, industry regulators and European standards bodies. The BMA provide an authoritative voice for the industry on all matters affecting manufacturing and supply.

# **WRAS**

#### WRAS WATER REGULATIONS ADVISORY SCHEME

The Water Regulations Advisory Scheme (WRAS) represents more than twenty water companies and:

- Coordinates consistent advice
- Promotes the water regulations
- Offers advice to industry and consumers
- Maintains directory of approved products

Products are tested against various requirements, grouped by:

- Mechanical tests (against TCS')
- Material / hygienic tests (against BS 6920)

Methven are strong supporters of WRAS approved products and offer a comprehensive portfolio of both Deva and Methven products which adhere to, and are approved to the stringent standards.

#### **TMV APPROVAL**

Thermostatic products are an integral part of the Methven and Deva by Methven ranges. For complete peace of mind they maintain a safe water temperature for users and will cut off if the cold water supply fails.

We use third party thermostatic valve accreditation partners to independently test the suitability of product against current legislation. Approval at TMV2 standard means the product complies with BS EN 1111/1287 and indicates suitability for use in the domestic home whilst approval at TMV3 meets NHS D 08 and indicates suitability for commercial installations such as care homes and hospitals.

Methven are proud to offer products in our portfolio which adhere to these standards having undergone the initial rigorous testing procedure and on-going audit requirements. We advocate continuous in-service testing at regular intervals to ensure there has been no temperature change ensuring maximum safety standards.

TMV approved products are highlighted with the relevant icon and correct at the time of going to print.

# **Confidence In Us**

The confidence we have in our products mean we are delighted to offer a comprehensive set of warranties for all of our products in our Methven and Deva brands.

All details are laid out below, for the latest warranty information see www.methven.com and www.deva-uk.com or call us on 0800 195 1602.

For full terms and conditions see www.methven.com

Methven will not be required to repair or replace products under this warranty where: • the system the products are fitted to contains debris • the product has been damaged by misuse, accident, or neglect • harsh detergents or abrasive cleaners have been used on the product • the product has been tampered with or repaired in any way other than in accordance with this warranty • the product has discolouration, corrosion or rusting from 'hard' water and/or other environmental factors

# Water Hardness & Warranty

### What is hard water?

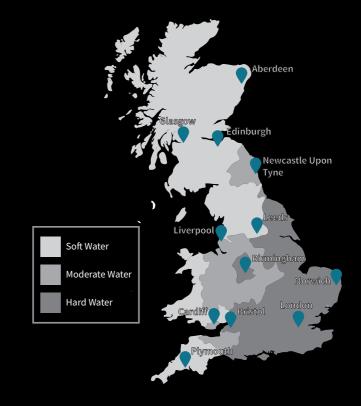

The simple definition of water hardness is the amount of dissolved calcium and magnesium in the water. Hard water is high in dissolved minerals, largely calcium and magnesium.

# Hard water and warranty

Hard water is a factor beyond our control. If limescale accumulates it can impact the functionality and finish of your taps and showers and affect the warranty conditions.

Here's a few simple steps to take to avoid damage to your products:

- Clean your taps regularly with warm water and a soft cloth to prevent stains.
- Never use harsh abrasive cleaners as these can damage the products finish.
- In particularly hard water areas consider the installation of a water softener to counteract the effects of limescale.

This map is a guide to water hardness by region, for absolute confirmation of the water hardness in your area please contact your local water authority.
